

Transferring kits to other accounts:

First you need a Microba login. You can create your Microba Discovery Portal account here:

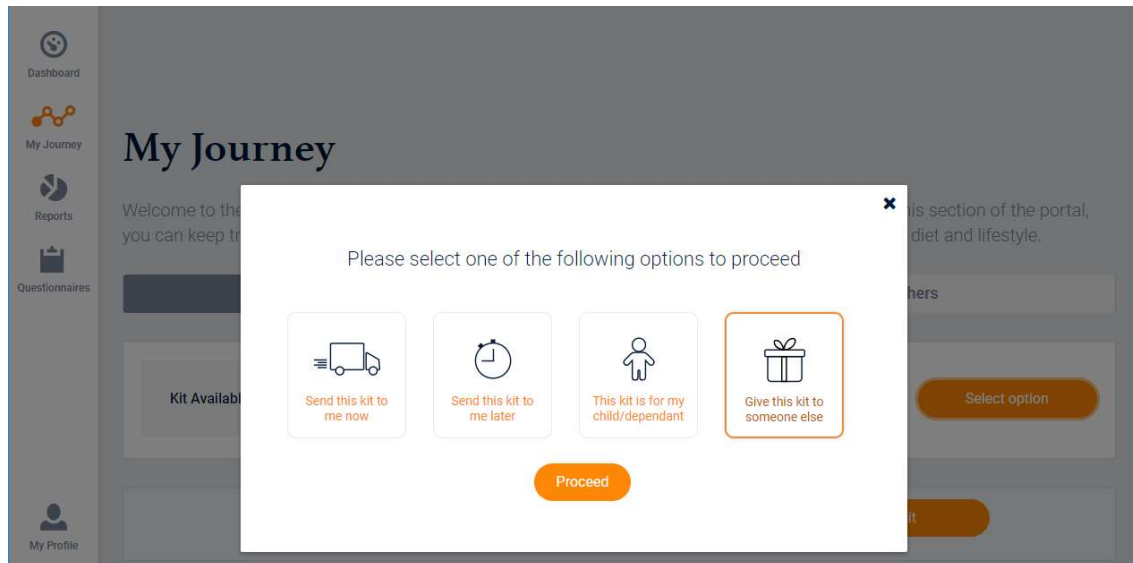

<https://discover.microba.com/register>

You will receive an email with a link to verify your email address.

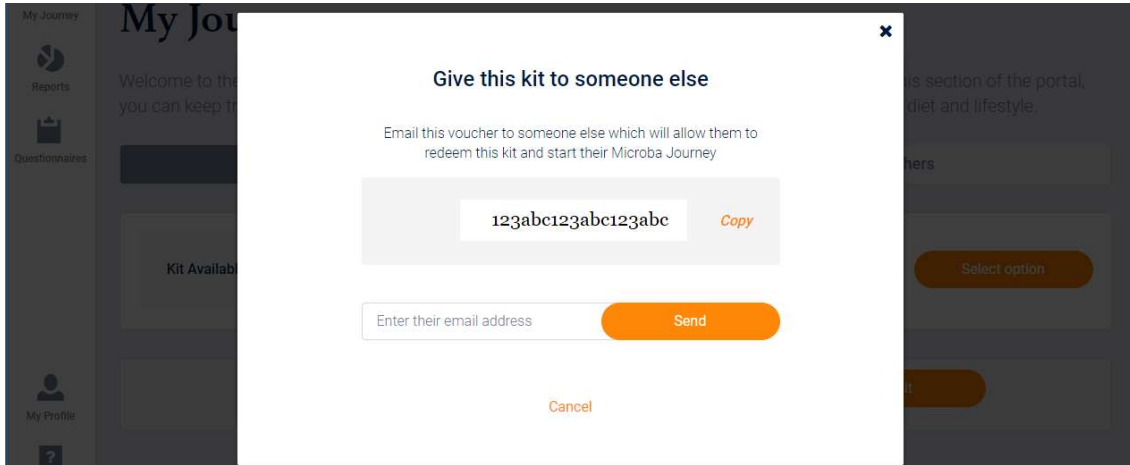

To send a kit to somebody else:

- 1) In your Microba account, go to "My Journey" and locate the kit that has the status "Kit Available"
- 2) Click "Select option" on the kit
- 3) Select "Give kit to someone else" and click proceed

- 4) Enter the email address (different to your own) for the person you are sending the kit and click send.

This will send an email to the person you have transferred the kit. Once the other person receives that email, they can follow the instructions to setup their own Microba account and redeem that kit for themselves.

You can also provide the code to the recipient manually, who can use the “Redeem a kit” button in their “My Journey” portal page.
